LINE

## OUR ESSENCE

*The first and only range of specialized treatments for every different kind of skin pigmentation, whether melanic or melano-hematic, based on phototype, pigmentation type and part of the body affected. Our treatments are easy to apply, providing fast and effective results, proven through “in vitro” and “in vivo” clinical trials.*

# GENTLE FOAM

150ml

Facial cleanser to prepare the skin before applying any MELINE® products.

## Indications

- High-performance cleanser.
- Balances uneven pigmentation.
- Energizing effect.

---

## Active Ingredients

Dexpanthenol, Bisabolol, Combination of Essential Minerals.

## Mode of Action

MELINE® Gentle Foam reinforces cell-to-cell communication, thereby preparing intercellular spaces to improve the penetration of the active ingredients. Furthermore, it has a chrono-energizing effect, reduces glycation and oxidative processes, thus contributing to establish the first steps to control the biochemical reactions that may stimulate the melanocyte.

## Treatment Protocol

Use before any professional or at-home skin care treatments.

## Application Protocol

Wet the skin with lukewarm water and apply a small amount of product, massage for some minutes and rinse off.

---

## USE

Professional / Home

---

## ZONE

Face and body

---

## CONTAINER

Dispenser

---

## CAPACITY

150ml - 5.07 fl.oz

---

*The specificity of the actives contained in MELINE<sup>®</sup> 00 Prep enables the modification of the skin permeability and polarity, immediately thinning the stratum corneum and re-establishing the correct function of the skin barrier. It also hydrates the skin and has antioxidant properties that help to prepare the skin for the depigmenting treatment.*

# 00 PREP

6 x 2ml

Cell repolarizing solution that reverses the skin polarity.

## Indications

- To increase skin permeability.
- Skin preparation before MELINE® depigmenting treatments.

## Active Ingredients

Nonapeptide-1, Lactobionic Acid, Ferulic Acid.

## Mode of Action

A product developed to enable easier active ingredient absorption into the skin prior to applying the controlled chemical dermabrasion MELINE® 01. Its ingredients enable quick and effective cell repolarization, favouring the subsequent activity of the MELINE® 01 ingredients.

## Treatment Protocol

A solution to permeabilise the epidermis used prior to applying the MELINE® 01 treatments.

## Application Protocol

After cleansing and degreasing the skin with MELINE® Gentle Foam uniformly apply the contents of one ampoule of MELINE® 00 Prep on the area to treat with a brush. Leave on to act for 3 minutes. There is no need to remove it before applying any of the MELINE® 01 depigmenting treatments.

# D1

*There is a wide variety of skin types, each with their unique characteristics. Depending on its phototype, the skin reacts in different ways to endogenous and exogenous factors that can cause hyperpigmentation on face and body. To respond to the needs of professionals, MELINE offers a wide range of products to treat each specific case.*

# 01 ID

6 x 2ml

Transdermal release solution  
to aid depigmenting treatments.

## Indications

- Extracellular matrix restructuration.
- Optimization of treatments for skin hyperpigmentation.

## Active Ingredients

Tranexamic Acid, Glutathione, Ascorbic Acid, Magnesium.

## Mode of Action

The combination of its ingredients achieves antioxidant and anti-inflammatory effects that lead to the inhibition of melanocyte synthesis and tyrosinase enzyme. It also causes depigmentation through pheomelanin pathway acceleration and the biochemical reduction of the deposited pigment.

## Treatment Protocol

Apply an ampoule every 10 days.

## USE

Step **2**

Deliver the content of one ampoule **MELINE<sup>®</sup> 01 ID** in the hyperpigmented areas at 2 - 3 millimetres depth.

Step **3**

Apply **MELINE<sup>®</sup> 01 Restore** and massage until absorbed.

Step **4**

Apply some drops of **MELINE<sup>®</sup> 01 Moist**, spread the product forming a thin layer and leave it to dry.

Step **5**

Finally, apply **MELINE<sup>®</sup> 04 B.B. Cream**.

# 01 CAUCASIAN SKIN

20g

Professional chemical dermabrasion mask for skin phototypes I-III.

## Indications

- Melasma/chloasma treatment for patients with phototype I – III.

## Active Ingredients

Tranexamic Acid, Retinal, Arbutin, Kojic Acid, Azelaic Acid.

## Mode of Action

Its active ingredients provide strong control and inhibition action against melanin synthesis, intervening in the pre-synthesis processes, directly inhibiting the tyrosinase enzyme, degranulating the intra-keratinocyte pigment, and favouring epidermal turnover and the removal of pigmented cells.

## Treatment Protocol

Perform 3 treatment sessions in total. The 2nd session should be performed after 30 days from the 1st one and the 3rd session after 6 to 8 months, following the directions in the chart below. Start using MELINE® 02 Caucasian Skin products at home right after the 1st session.

# 01 ETHNIC SKIN

20g

Professional chemical dermabrasion mask for skin phototypes IV-VI.

## Indications

- Melasma/chloasma treatment for patients with phototype IV – VI.

## Active Ingredients

Tranexamic Acid, Retinal, Pyruvic Acid, Ascorbic Acid, Salicylic Acid.

## Mode of Action

Its elements combine to provide total control over irritation and inflammatory activity, forming a product with outstanding melanin synthesis inhibitory action with epithelial turnover, but without the risk of rebound pigmentation, a significant aspect when treating ethnic skin.

## Treatment Protocol

Perform 3 treatment sessions in total. The 2nd session should be performed after 30 days from the 1st one and the 3rd session after 6 to 8 months, following the directions in the chart below.

Start using MELINE® 02 Ethnic Skin products at home right after the 1st session.

## Follow-up at home

# 01 SPOTS

STEP 1: 5ml + STEP 2: 7g

Two-step depigmenting kit for solar lentigines.

### Indications

- Solar lentigines.
- Hyperkeratosis treatment.

### Active Ingredients

Step 1: **Tranexamic Acid**, Azelaic Acid, Resorcinol.

Step 2: **Pyruvic Acid**, Salicylic Acid.

### Mode of Action

The synergic actions of its active ingredients gently penetrate the skin in order to eliminate specific skin lesions, such as lentigines and hyperkeratosis.

### Treatment Protocol

Perform one treatment session following the directions in the application protocol. If necessary, a second session can be performed after 45 days.

# 01 INTIMATE

6 x 2ml

Balances uneven pigmentation  
in the intimate areas.

## Indications

- Reduces hyperpigmentation in the genito-anal region.

## Active Ingredients

Tranexamic Acid, Retinal, Lactobionic Acid, Mandelic Acid.

## Mode of Action

The combination of its ingredients provides potent depigmenting and antioxidant activity, effectively reducing hyperpigmentation in the genito-anal region.

## Treatment Protocol

Perform 3 treatment sessions at intervals of 21 days following the directions in the application protocol. Three days after in-office treatment, the patient should start to apply MELINE® 02 Intimate, preferably morning and night.

# 01 RESTORE

250g

Restores the physiological conditions of the skin minimizing the risk of rebound effects after treatment.

## Indications

- Skin recovery.
- Pigment rebound prevention.

---

## Active Ingredients

Rosa Rubignosa, Aloe Vera, Arnica, Centella Asiatica, Glycyrrhetic Acid.

## Mode of Action

This formula combines selected actives that effectively promote skin healing and collagen production. Thus, it perfectly restores the natural skin condition.

## Treatment Protocol

Use right after the administration of a MELINE® depigmenting treatment, following the directions in the application protocols.

## Application Protocol

Gently massage the product on the skin until completely absorbed.

*MELINE® 02 products have been formulated to work in synergy with MELINE® professional treatments, optimizing their efficacy and maintaining long-lasting results. The potent depigmenting action of these serums and emulsions complements the effects of the products applied in-office, and they are crucial for the success of the treatments.*

# 02 CAUCASIAN SKIN

## DAY

30ml

Skin brightening serum  
for phototypes I-III.

### Indications

- Improves and delays the appearance of pigmentations in skin phototypes I-III.
- Reduces melanin deposits.

### Active Ingredients

**Tranexamic Acid**, Glutathione, Kojic Acid, Copper Tripeptide, Lactobionic Acid, Phytic Acid.

### Mode of Action

The combination of its active ingredients provides a strong tyrosinase enzyme inhibition effect, leading to reduced pigment synthesis. They also promote pigmented keratinocyte degranulation and removal.

### Treatment Protocol

Use the product for at least 90 days. The professional will determine the exact treatment duration.

### Application Protocol

After cleansing the skin with MELINE<sup>®</sup> Gentle Foam, apply on the entire face and massage until completely absorbed. Allow it to dry. It is recommended to apply the MELINE<sup>®</sup> 03 Moist occlusive repair product and MELINE<sup>®</sup> 04 B.B. Cream.

# 02 CAUCASIAN SKIN

## NIGHT

20g

Night depigmenting emulsion  
for skin phototypes I-III.

### Indications

- Improves and delays the appearance of pigmentations in skin phototypes I-III.
- Inhibits tyrosinase enzyme expression, in turn inhibiting melanin synthesis.

### Active Ingredients

Retinal, Arbutin, Azelaic Acid, Melanostatine-5, Thiocctic Acid, Magnesium.

### Mode of Action

The synergic effect of its ingredients effectively reduces the mRNA transcription required for tyrosinase synthesis, leading to effective melanin synthesis inhibition.

### Treatment Protocol

Use the product for at least 90 days. The professional will determine the exact treatment duration.

### Application Protocol

After cleansing the skin with MELINE® Gentle Foam, apply a thin layer over the entire area, massaging it in until fully absorbed. In case of irritation, use every two days for two or three weeks, before continuing to apply it daily.

## 02 ETHNIC SKIN

### NIGHT

20g

Night depigmenting emulsion  
for phototypes IV-VI.

#### Indications

- Improves and delays the appearance of pigmentations in skin phototypes IV - VI.
- Inhibits tyrosinase enzyme expression, in turn inhibiting melanin synthesis.

#### Active Ingredients

**Retinal**, Arbutin, Ascorbic Acid, Melanostatine, Mandelic Acid, Niacinamide.

#### Mode of Action

Its ingredients effectively reduce the mRNA synthesis required for tyrosinase production, which when stopped, reduces melanin synthesis too. They also block melanosome release, along with clearing and homogenising the pigment.

#### Treatment Protocol

Use the product for at least 90 days. The professional will determine the exact treatment duration.

#### Application Protocol

After cleansing the facial skin with MELINE® Gentle Foam, apply a thin layer on the entire face, massaging it in until fully absorbed. In case of irritation, use every two days for two or three weeks, before continuing to apply it daily.

# 02 SPOTS

10ml

Whitening gel-like formula  
for solar lentigos.

## Indications

- Improves and optimizes the depigmenting effects of MELINE® 01 Spots.
- Enhances treatment for solar lentigines and hyperkeratosis.

## Active Ingredients

Tranexamic Acid, Retinal, Phenylethyl Resorcinol, Phytic Acid, Melanostatine-5.

## Mode of Action

The potent activity of its ingredients controls melanin synthesis and pigment deposits, along with regulating the harmful action of reactive oxygen species and nitrogen radicals, which are involved in the genesis and permanence of the pigment lesion.

## Treatment Protocol

Use the product for at least 30 days. The professional will determine the exact treatment duration.

## Application Protocol

After cleansing the skin with MELINE® Gentle Foam, apply a small amount to the affected area twice a day, morning and night.

## USE

Home

## ZONE

## 02 DARK CIRCLES

10ml

Dark circles and periocular pigmentation remover.

### Indications

- Solves pigmentary disorders in the periocular area after MELINE® 01 Dark Circles.

### Active Ingredients

Tranexamic acid, Arbutin, Ginkgo Biloba, Troxerutin, Flavonoids, Ruscus Aculeatus.

### Mode of Action

Combination of depigmenting actives that have been selected for their high skin tolerability in the periorbital region. Improves and attenuates dark circles, reduces melanin deposits and melano-hematic pigmentations. Furthermore, stimulates cell division thereby helping to reduce the visible signs of skin photoaging.

### Treatment Protocol

Use it for at least 60 days, starting the 2nd day after having been treated with MELINE® 01 Dark Circles.

### Application Protocol

Apply in the mornings and nights after cleansing the skin with MELINE® Gentle Foam. Form a layer on the periorbital region and leave it to dry. Do not remove.

*Sun protection creams with a make-up base to mask imperfections. The B.B. CREAM initials come from Blemish Balm, a balm for imperfections. These creams manage to correct imperfections, hydrate, brighten the face, and act as a sunscreen. The concept involves combining three products in one: a specific treatment, a moisturising cream, and foundation makeup.*

# 04 B.B. CREAM

## LIGHT / MEDIUM

30g

Correction and sun protection cream with SPF 30.  
Available in two shades.

### Indications

- Suitable sun protection when treating hyperpigmentation.
- Skin corrector
  - LIGHT: types I - III.
  - MEDIUM: types IV - VI.

### Active Ingredients

**Octocrylene**, Butyl Methoxydibenzoylmethane, Bran Oil, Oryza Sativa, Retinol, Rosa Moschata Seed Oil, Biotin.

### Mode of Action

Its active ingredients combine to hydrate and revitalise the skin tissue, along with protecting it against ultraviolet radiation activity.

### Treatment Protocol

Apply in the morning and reapply once or twice a day depending on your skin's needs and exposure to the sun. It is important to use it every day to protect the skin from the harmful effects of ultraviolet radiation on the skin tissue.

### Application Protocol

Uniformly apply small doses with your fingers or using a make-up sponge if possible. It is not required to apply a moisturizer before this product but if you need extra hydration use MELINE® 03 Moist first and once absorbed apply MELINE® 04 B.B. Cream.
